- Theme- SMART AUTOMATION
- PS Category- Software
- Team ID-
- Team Name (Registered on portal)- PRAVYON

IDEA TITLE

PRAVYON — AI-Powered Predictive Early-Warning Layer for PAIMANA

Beyond monitoring — a self-updating system that predicts risk, explains why, and recommends what to do next.

- ▶ Predicts risk BEFORE it happens — not just tracks what already went wrong
(leakage-free, evidence-tested against traditional statistics — not assumed)
- ▶ Explains every risk score in plain language, not a black-box number
(officials know exactly WHY a project is flagged, and what's driving it)
- ▶ Fully automated pipeline — new PAIMANA data flows in, risk scores flow out, zero manual work

FEASIBILITY

Authority Integration

Centralizing dashboards and reporting for seamless coordination.

Cost-Effectiveness

Reducing manual monitoring and administrative efforts.

Scalable Deployment

Implementing the platform for a few projects and gradually expanding.

Infrastructure Reusability

Leveraging existing government databases and digital systems.

Challenges vs Mitigation

Challenge/Risk	Our Mitigation
PDF format changes across reports	Content-based detection, not fixed page numbers
Limited historical months initially	Rule-based fallback until model matures
Training dataset released post-selection	Pipeline works with any data provided
Building trust in AI-driven flags	Every prediction shows plain-language reasons

VIABILITY

Real-Time Monitoring

Continuous tracking of project progress, cost, timelines, and key milestones through a centralized dashboard.

Data-Driven Decisions

Using real-time project data, analytics, and automated insights to identify issues and make informed decisions.

Early Risk Detection

Identifying delays, cost overruns, and implementation risks at an early stage to allow timely corrective actions.

Improved Coordination

Connecting multiple departments and stakeholders on a single platform to ensure better communication, transparency, and faster resolution of issues.

Faster Project Completion

Reduces delays through real-time tracking of milestones, activities and project progress.

Transparency & Accountability

Centralized project data improves visibility, monitoring and accountability among stakeholders.

Early Risk Detection

Identifies delays, cost overruns and implementation issues at an early stage.

Cost & Resource Optimization

Helps monitor project costs and resources, reducing wastage and improving utilization.

Faster Corrective Action

Provides timely alerts and insights so authorities can take corrective action quickly.

Data-Driven Decisions

Real-time analytics and automated insights support faster and better project decisions.

Better Coordination

Connects departments and stakeholders through a single integrated monitoring platform.

Technology & Scalability

Uses dashboards, APIs, automation and analytics to enable scalable digital project monitoring.

Research → Data Sources → Analysis → Our Solution

IMPORTANT INSTRUCTIONS

Please ensure below pointers are met while submitting the Idea PPT:

1. Kindly keep the maximum slides limit up to six **(6)**. (Including the title slide)
2. Try to avoid paragraphs and post your idea in points /diagrams / Infographics /pictures
3. Keep your explanation precise and easy to understand
4. Idea should be unique and novel.
5. You can only use provided template for making the PPT without changing the idea details pointers (mentioned in previous slides).
6. You need to save the file in PDF and upload the same on portal. No PPT, Word Doc or any other format will be supported.

Note - You can delete this slide (Important Pointers) when you upload the details of your idea on SIH portal.
